SEED HELP

SECRET SEED CLUB

Welcome to our Secret Seed Club! Occasionally, we pop in our mysterious seeds into our magnificent boxes, last seen in our Limited Edition Urban Rooftop Box. These elusive little packets of seeds change from time to time and can be discovered on our Secret Seed Club section.

Our latest Secret Seed is... (drum roll) ... Radishes! Our No.1 Cherry Belle Radishes are perfect window box winners and so simple to grow. If you have some budding little growers, try growing Radishes as they are so easy and quick to grow! You can plant these tasty treats and have a harvest ready in just a few weeks – pot to plate in just a month!

If you're growing with some young budding gardeners, you can prepare a window box and pop in seeds about 1cm deep and 3cm apart – you can use one of our handmade ALLOTINABOX® dibblets if you're little ones don't want to get their hands dirty! As they grow to harvest in a few weeks, Radishes make an easy selection for your edible garden or balcony.

Radishes turn a little woody just before they seed so make sure you harvest just before. These seeds can be grown in small spaces and best kept in shade over the summer. Although we don't get the hottest of summers, it is a good idea to keep the plants moist so they don't dry out.

Not only do they look vibrant and fresh, they are packed full of Vitamin C and totally yummy in a leafy salad adding a fresh peppery crunch or roasted with summer vegetables. For more recipes, visit our 'Harvest & Cook' section.

Happy Growing!
